Yale-New Haven Hospital Transplant and Vascular Surgery Unit

Whether you're interested in intensive care or working on a specialized surgical floor, the 26-bed Transplant and Vascular Surgery Unit at Yale-New Haven Hospital has the opportunities you're looking for. Here both experienced and graduate nurses find new clinical challenges with renal, pancreas and liver transplant and donor patients, as well as with vascular patients requiring surgical and/or medical intervention.

Our culture is oriented toward collaborative practice and excellence in patient care, providing RNs with the opportunity to participate on a multidisciplinary team including patient care associates, environmental associates, business associates and student nursing associates.

All new staff RNs receive orientations customized to match their specific background and range of experience. Experienced nurses typically undergo a 6-week orientation, while graduate nurses can expect a personalized 12-week orientation schedule. A dedicated preceptor and unit-based educator will assist you in acquiring the skills and knowledge necessary to care for our specialized patients.

All members of our team participate in continuous quality improvement initiatives aimed at patient safety and satisfaction. The Transplant and Vascular Surgery Unit is also an active member of the Yale-New Haven Hospital Striving for Excellence Campaign.

TRANSPLANT ICU

The new 8-bed Transplant Intensive Care Unit at Yale-New Haven Hospital enhances our existing transplant program, providing expert care to liver, kidney and pancreas transplant patients.

Yale-New Haven Hospital offers unparalleled opportunities for career mobility and growth. The Transplant and Vascular Surgery Unit provides a unique environment in which nurses are encouraged to utilize their critical thinking and problem-solving skills in planning and delivering complex, highly sophisticated patient care. As a part of a world-class multidisciplinary team, the possibilities are limitless.
